VALUE MANAGEMENT

BELDEN

Topic

35. Value Management Forum

"Gold-Mine Metaverse / Smart Factory II"

Global production supply chains, requirements for **energy reliability** are significantly changing. One of the **solutions** to these challenges is the enhanced digitization of production resulting in SMART Factories:

1. What exactly is METaverse / **SMART FACTORY II**?
2. What are the **benefits and requirements** to use enhanced digitization for internal and external supply chains?
3. How is an accelerated digitization **driving business performance** ("gold-mine") across key industries like energy, automotive, mechanical engineering, and others?
4. Why is **IT/OT convergence** (information / operations technology) an enabler for Operational Efficiency?

We look forward to discussing these and other elements with you and our **expert** panel, and generating an **exciting exchange of ideas**.

Networking facilitation

We hope that this event can connect people.
